median $10^{-7.3}$
4320 runs
median $10^{-7.8}$
4320 runs
Proposed: uniform from the states the density counts, $p > 0.1/2^N$
median $10^{-1.7}$
3265 runs
median $10^{-2.4}$
3500 runs
median $10^{-3.1}$
3732 runs
median $10^{-3.6}$
3994 runs
The same, topped up to six from the rest of the support
median $10^{-2.0}$
4320 runs
median $10^{-2.7}$
4320 runs
median $10^{-3.2}$
4320 runs
median $10^{-3.7}$
4320 runs
Stratified in $\log_{10} p$ over the whole support
median $10^{-3.8}$
3930 runs
median $10^{-4.7}$
4030 runs
median $10^{-5.2}$
4005 runs
median $10^{-5.5}$
4054 runs
Drawn with probability p (as a measurement would)
median $10^{-1.7}$
4320 runs
median $10^{-2.0}$
4320 runs
median $10^{-2.2}$
4320 runs
median $10^{-2.4}$
4320 runs
